

This is a brief outline of my work experiences to date please feel free to view the examples on my website.

## A little about me.

After graduating in 04' I grabbed my camera and headed straight for the mountains to produce NZ's first ever freeski film. Since then the snow industry has been my base for work; from being contracted as follow cam for most of the major ski and snowboard events, to running the full 3 camera event coverage of the freeski open. I have always prided myself on producing content of the highest quality and not settling for anything less. Over the past two years I have broadened the range of action sports I have been shooting to Surfing, Skate Boarding, Base Jumping and Multi sport races. Generally if it moves fast and gets the blood pumping I get a stoke out of shooting it.

## Qualifications

2003-2004 Diploma in multimedia design. NATCOL, Christchurch.

This course covered filming, editing, 3d animation, motion graphics and greenscreen work.

Work Experience	Year	Type
-Peak bindings (ski binding Company)	2010	Promo
